WHERE **YOU** CAN: BECOME PRO-SOBER

Hello, I thought you guys (and gals) might be interested in getting ahead of the crowd recovery wise just like I did when I quit 3 1/2 packs a day cold turkey. Well you are in luck I have a system of recovery that enables any one to master their addictions and become pro-sober. And because it involves creating a pro-sober belief system you can add this on to any and all other methods.

And it is available @ www.therealmofdouglas.com, visit my site and take advantage of my cutting edge addiction shattering product line. If you are interested in addiction recovery you have found the right man. I have an extremely effective book - quite possibly the most simplistic yet powerful method of addiction recovery ever published! "THE QUIT USING DRUGS PLAN ..." Available through this link.

So while you are waiting, let me explain a couple of things that my resources address very, very well ...

Question: What are most addicts doing that just simply does not work and how can you avoid being one of them?

Answer: Addicts are struggling - trying to build up an ability to resist their own urges and consequently the harder they play the harder it gets. You see fighting your self is a game that can't be won. The only way to win is to not play. Your belief system is creating this game (where you have desires to use even though your are trying to quit) so instead of constantly struggling to resist which is what most people do, focus on the cause not the symptom, focus on your beliefs. One super easy way to do this is to pull out some pen and paper the next time you have a desire to use and take a minute to write out the pros and cons of using and not using. What this does is help create functional willpower as opposed to dysfunctional willpower. Dysfunctional willpower is where you resist your own urges or in other words your own power over your own desires. This is caused by having a contradictory belief system. But you only need it if you are doing something wrong. My book shows you how exactly to increase your functional willpower so you can quit your addiction, note this does NOT require being extremely powerful; it really only takes about as much functional willpower to quit as it might take to make a peanut butter and jelly sandwich - but it has to be functional! And for that to happen you need to sort out your beliefs so your beliefs are NOT contradictory. This is the key, if knowledge is power it is very unreliable power if that knowledge is contradictory. Now think on how many months or years you have built ideas that support using? It is going to take very serious techniques to undo and sort out all of that material in order to cause the change we need for our recovery but it can be done. Get the book "THE QUIT USING DRUGS PLAN ..." Click this link to order your copy today.

AND I happen to have a very effective COMPLETE SIMPLIFIED SOLUTION available at my website that can really put you in complete control of your addictions so you don't have to struggle like everyone else. FEATURING:

HOW TO GUIDES: Sophisticated yet simple guides put you in complete control of your addictions - perfect for the addict who is still using AND for those who may have already quit. Discover the missing link in your recovery. Find out why so many people relapse and how you don't have to be one of them EVER. Discover a process that enables anyone to be able to think their way out of an addiction at any stage, discover what true recovery means (you no longer have any interest in using) first hand and live that fact once and for all.

MEDITATION: Learn how to meditate like a pro and gain same day therapeutic benefits with this elite stratosphere level personal development technique.

Below you can see (1 hz) A.M. BRAINWAVE ENTRAINMENT, very effective means of entrainment, very powerful.

BRAIN WAVE ENTRAINMENT: Synchronize your entire brain with this highly effective audio technology. Referring to the brains frequency following response “brain wave entrainment” can be an amazing way to cause the left and right hemispheres of the brain to communicate much better relieving stress and allowing more room for progress professional or otherwise, when your whole brain is “in sync” you do much better. There is an enormous amount of information online regarding entrainment but very few sources are as affordable as they are at www.therealmofdouglas.com, I decided to offer this after studying entrainment for several years and realizing how beneficial it would be for every ones recovery. I literally use the exact same program that I offer and have since 2012. Cause the evolution of your own brain - creating real lasting change.

SUBLIMINAL MESSAGES: Leverage the power of your subconscious mind, your thoughts can be influenced subconsciously with out effort and these new ideas in your head can slowly start manifesting helping to create the success in addiction recovery (that you want) a reality. Warning this is hard core material you just can not get virtually any where else, not only are subliminal messages hard core mind control techniques to begin with (used for a good purpose) but unlike other “gurus” I actually know what types of messages make extremely effective pro-sobriety recordings, and believe me you are not going to find any thing like it any where else (unless people start ripping me off) I know what it takes for some one to master their addictions and the messages I sell facilitate this understanding, enhancing everything else I offer. Below you can see that the subliminal messages are higher in amplitude than the background wave so you know your subconscious gets it even though you can not consciously hear it.

Background with entrainment lower in amplitude.

Subliminal message greater in amplitude.

MENTAL PROGRAMMING: Messaging audio that implants beliefs into your psyche while bypassing the rational mind for people who need to be re-conditioned. Every one has a belief that may be holding them back, understanding the learning process is crucial for developing empowering beliefs, these audio sessions provide a simple short cut so you can reprogram immediately. Perfect for people who want their recovery to be easier, some people have a hard time changing now you don't have to be one of them.

JUST 5 MINUTES PER DAY!

**Compressed high speed messages;
extremely hardcore stuff.**
